

# A clear solution for farmers

CATCHMENT SENSITIVE FARMING

## Reducing Diffuse Water Pollution from Agriculture Workshops for agronomists, land agents, consultants and advisers

Reduction of Diffuse Water Pollution from Agriculture (DWPA) is key to meeting Water Framework Directive targets in many catchments. Failure to meet WFD targets by voluntary action could lead to the introduction of statutory measures.

Catchment Sensitive Farming provides **FREE** information, advice and training for farmers and landowners. This workshop is for advisers and consultants to help you advise your clients, and will cover:

- Update on recent developments in the CSF programme
- CSF grant aid for measures to reduce diffuse pollution
- Understanding the “Mitigation Methods User Guide” to help you provide guidance to your clients
- Introduction to FARMSOPER - a new planning tool for advisers

**5 BASIS and 2 NRoSO points available**

## Agenda

9:30 Tea/coffee

9:45 The Water Framework Directive & Catchment Sensitive Farming

- What's the problem and where is it?
- Local DWPA Solutions

10:45 Break
